

Citi Bank Fit-out

With Betts Townsend's fit-out and construction experience, we were appointed as Co-Construction Managers along with AECOM for Citi Bank in Gigiri, Nairobi.

The bank's Gigiri branch included tellers, vault rooms, board-rooms, offices, AV room, a kitchenette, a server and technology rooms and consultation rooms. With an in-depth knowledge in construction processes and quality assurance, Betts Townsend acted as lead Project Manager to ensure that the bank quality standards exceeded. Our attention to design control, programme control and team management is a skill that ensures our projects are delivered within budget and on time.

It is our philosophy to proactively manage a project, with stakeholders, consultants and contractors alike, in a supportive manner that focuses on solutions rather than problems. It is our way, when encountered with unexpected problems to focus, manage and assist in finding a resolution.
